Hack The Box: <https://app.hackthebox.com/public/users/2475852>

PROFILE

Junior Penetration Tester with hands-on experience across Active Directory, Windows/Linux systems, and web application security through Hack The Box and OffSec Proving Grounds labs.

Completed PEN-200 and developed a personal Active Directory home lab simulating enterprise environments, focusing on domain enumeration, credential attacks, lateral movement, and privilege escalation.

Strong ability in structured enumeration, exploitation, and security reporting, supported by 8 years of experience in regulated healthcare environments requiring accuracy, confidentiality, and disciplined documentation.

Preparing for the OSCP and CSTM certification

CYBERSECURITY PORTFOLIO (GITHUB)

GitHub Portfolio: <https://github.com/Hussam-creator/cybersecurity-portfolio/> Hussam-creator

- 50+ machines completed across Hack The Box and Proving Grounds Practice
 - Active Directory home lab (domain controller, client machines, attack simulation)
 - Penetration testing writeups (Linux, Windows, Active Directory, API security)
 - Security cheatsheets (enumeration, privilege escalation, attack methodology)
 - Penetration testing reports (professional-style reports – in progress)
-

TECHNICAL SKILLS

- Penetration Testing Lifecycle: reconnaissance, enumeration, exploitation, privilege escalation, post-exploitation
 - Active Directory Security: enumeration, Kerberos attacks, credential abuse, lateral movement
 - Web Application Security: OWASP Top 10, manual testing, Burp Suite
 - Windows & Linux Exploitation: privilege escalation and misconfiguration abuse
 - Reporting: structured documentation of findings and attack chains
-

PRACTICAL EXPERIENCE

Hack The Box / Proving Grounds / PEN-200 Labs / Hack The Box Academy

- Completed 50+ machines in simulated enterprise environments
 - Performed full attack chains from enumeration to system compromise
 - Practised Active Directory attacks including credential exploitation and domain compromise
 - Conducted Windows and Linux privilege escalation across multiple scenarios
 - Documented methodologies and findings in structured writeups
-

Active Directory Home Lab

- Built Windows Server domain environment for security testing
 - Simulated enterprise misconfigurations and attack paths
 - Practised LDAP, SMB, and Kerberos enumeration
 - Performed credential attacks and full domain compromise simulations
-

PROFESSIONAL EXPERIENCE

Pharmacy Technician (2018–Present)

- Operate in a regulated environment requiring high accuracy and confidentiality
- Handle sensitive data in compliance-driven workflows

- Maintain structured documentation and prioritisation under pressure
 - Communicate effectively with healthcare professionals and patients
 - Developed strong attention to detail and disciplined operational thinking
-

CERTIFICATIONS

- CompTIA Security+
 - CompTIA Network+
 - CompTIA A+
 - PEN-200 (Offensive Security Training – completed)
-

EDUCATION

Bachelor's Degree in Biomedical Science
University of East London
